this book relates dna and the genetic code toconsciousness as the universal principle of life this is done through perception of seven pattern germsfrom dna which are girdled into an archetypal model called the tree of life the symbols of the tree modelare logically related to the self spirit soul psyche and body how this new approach helps to understand the phenomenon of life in its integrated wholeness and cosmic totality is explained in this book it heralds the dawn of a new science of life which translates theinnate mysticism of religions into the language ofscience it provides novel keys to consciousness and creativity in relation to the transcendental horizon of the human being and the spiritual growth ofhumanity at large

what if you could pick the right home for successful living what if you can pick the perfect partner for love and marriage what if you can know which car you will enjoy the most what if your can know if you are in the right career what if you could tell what tomorrow would be like and so on would life not be easier if you could know how safe your children are at anytime would you not worry less if you know your partner will never be unfaithful how great it would be to know that you will win a court case or a contract deal

for many years genes have been thought of as immutable you can t change it s hereditary was the mantra but studies now show that genes are functioning and changing every minute every second according to the divine code of life dormant genes have the potential to wake up and transform personality and outlook the book shows how mental and emotional factors negatives like stress and positives like excitement joy gratitude and spirituality are also involved in switching genes on or off drawing on recent scientific research and the author s own observations this book shows that humans can bring forth their talents at any age how dr murakami argues that a positive outlook can

turn on the genes that are necessary to bring happiness and success into anyone s life and turn off the bad genes he calls this process genetic thinking a science based approach to controlling the genes by cultivating enthusiasm and inspiration
