proceedings of an international conference held in Vancouver, B.C., August 1993 to commemorate the 50th anniversary of the founding of the journal *Mathematics of Computation*. It consisted of a symposium on numerical analysis and a minisymposium on computational number theory. This proceedings contains 14 invited papers, including two not presented at the conference: an historical essay on integer factorization and a paper on componentwise perturbation bounds in linear algebra. The invited papers present surveys on the various subdisciplines covered by *Mathematics of Computation* in a historical perspective and in a language accessible to a wide audience. The 46 contributed papers address contemporary specialized work. Annotation copyright by Book News, Inc., Portland, OR.

This third edition of *Teaching Mathematics for the 21st Century* continues to help teachers let the secret out to open up to their students the wonderful discoveries and challenges of the pattern making and problem solving aspects of a fascinating subject: mathematics. The rationale remains the same: to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students. Changing demographics, knowledge of how people learn, and technology all impact the way we educate our young people. This edition incorporates lessons and strategies from programs that have proven success in many types of classrooms. Many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts. Although technology is constantly being upgraded, ways to increase student motivation through its application remains a goal. For example, since applets can enhance a lesson, whether the teacher uses a computer, projector, a smart board, or has students work individually on computers, we have identified several sources of mathematics applets that can be correlated to various lessons. Research citations and summaries have been updated to reflect current information on teaching and learning for future teachers.
