David Jones has written a compelling book about the complex issues entailed in being family members of sufferers from mental illness. The book provides us with a critical appraisal of the sociological and psychological conceptual layers and the policy context necessary for understanding these issues, all too often missing in other books written about this subject. Through in-depth interviews of forty carers, coached in a way which enables the carers to talk in their own voice, we get the rare opportunity of understanding the world of these carers. In letting the carers speak, Jones is enabling all of us to listen to them with the respect they deserve. All of us, but especially mental health professionals, policy makers and researchers, need to learn from the methodology utilised in this study and the content of the rich experiential seam Jones exposes as to how to listen better to carers and on which themes to focus in our working partnership with users and carers. Professor Shulamit Ramon Anglia Polytechnic University, Cambridge. This book fills a gap in our knowledge about the experiences of families of people suffering from severe mental illness. Original research material is used to support claims that families are struggling with complex feelings such as loss, anger and shame. It is also argued that the ideas families themselves hold about mental illness form an important part of the cultural world in which mental illnesses are understood. This stimulating book challenges many conventional assumptions about family relationships by arguing that they have to be understood in terms of myths that bring a certain amount of order to complex areas of emotional life. The author argues that families, if properly understood, can provide significant support for people with severe mental illness.

Routledge Library Editions Group Therapy consists of nine titles originally published between 1972 and 1994. It brings together authors from Europe, the UK and the US and includes a selected bibliography of group psychotherapy for students and teachers. Out of print for some time, it is now available again, either as a set or as individual volumes in your choice of print or ebook. This is a great opportunity to trace the historical development of group therapy from a number of different perspectives.

Originally published in 1984, this is the first published account in English of the development of group psychotherapy in France under the leadership of Professor Didier Anzieu. Psychoanalysts actively and ingeniously brought psychoanalytical insights to bear upon group

process these methods were widely applied in training groups for mental health professionals as well as in many other organizations anzieu and his colleagues made many advances in understanding the psychology of large group situations and these advances contributed to the growing interest in the field the main aim of the book is to examine the unconscious life of the human group professor anzieu describes the processes of fantasy and imagination that are common to social organizations training groups and psychotherapeutic groups and extends the psychoanalytical theory about dreams to the group he gives an account of the various kinds of group fantasies such as the group illusion the group as a mouth breaking apart fantasies the group machine and the self destructive group the book is illustrated by ten clinical case studies which are vividly described by professor anzieu the interaction of the imaginary processes and the social ideas of the group are also studied and the theoretical discussion in general reflects the interest of french psychoanalysts in the earliest structures of the mind and of the psychotic level of the personality as it becomes manifest in the group process

this volume was inspired by the 48th conference of professors of english at the university of orleans may 16 18 2008
