this volume contains revised and extended versions of a selection of the papers presented at the amsterdam workshop on language contact and creolization these studies apply the concept of relexification to creoles as well as other contact languages highlight the relevance of strategies of second language learning for theories of pidgin creole genesis critically discuss the notions levelling koine formation and convergence the relation between types of contact situations and processes of crosslinguistic influence as well as the linguistic consequences of the social structure of the plantation system in addition to discussing english french and dutch related creoles the papers cover a wide range of contact languages spoken throughout africa asia and europe the breadth and coverage makes this an indispensable title for research in the field of contact linguistics

the studies in language change in contact languages showcase the contributions that the study of contact language varieties make to the understanding of phenomena such as relexification transfer reanalysis grammaticalization prosodic variation and the development of prosodic systems four of the studies deal with morphosyntactic issues while the other three address questions of prosody the studies include data from the atlantic creoles saramaccan sranan haitian creole jamaican creole trinidadian creole papiamentu as well as singapore english this volume originally pulished as special issue of studies in language 33 2 2009 aims to make the work of several language contact experts available to a wider audience the studies will be of use to any student or scholar interested in different approaches to contact induced

language processes particularly as they relate to morphosyntax and prosody

this is the fourth edition of a work which first appeared in 1965 the first edition had approximately one thousand pages in a single volume this latest volume has almost three thousand pages in 3 volumes which is a fair measure of the pace at which the discipline of physical metallurgy has grown in the intervening 30 years almost all the topics previously treated are still in evidence in this version which is approximately 50 bigger than the previous edition all the chapters have been either totally rewritten by new authors or thoroughly revised and expanded either by the third edition authors alone or jointly with new co authors three chapters on new topics have been added dealing with dry corrosion oxidation and protection of metal surfaces the dislocation theory of the mechanical behavior of intermetallic compounds and most novel a chapter on polymer science for metallurgists which analyses the conceptual mismatch between metallurgists and polymer scientists way of looking at materials special care has been taken throughout all chapters to incorporate the latest experimental research results and theoretical insights several thousand citations to the research and review literature are included in this edition there is a very detailed subject index as well as a comprehensive author index the original version of this book has long been regarded as the standard text in physical metallurgy and this thoroughly rewritten and updated version will retain this status
